#### IN A NUTSHELL ...

The Hidden Business Champions Summer School is a two-week European adventure for students interested in innovative business and sales models, who want to witness how innovative European business can be, for students who want to meet people from all over the world and work together on interesting cases, and who want to discover two beautiful cities in Europe!

This Summer School is a collaboration between
Artevelde University College Ghent (Belgium)
and University of Applied Sciences Upper
Austria (Austria).

### FIRST WEEK - PROGRAM (GHENT)

The first week of this summer school will be held at Artevelde University College in Ghent and will focus on cooperative and design thinking, which will unleash your creativity in order to bring you from an idea to a prototype.

The methodology we use is based on Human Centered Design, offered by certified people in this domain.

The majority of the summer school will be built around the principles of learning by doing. You will experience a creative process and learn to use new skills that stimulate your ability to solve problems. Some of you will work on their own ideas. Others will work on someone else's idea.

We reinforce the idea of applied learning through inspiring company visits.

Of course, there is also room for leisure. You will get to know the beautiful city of Ghent through many social activities.

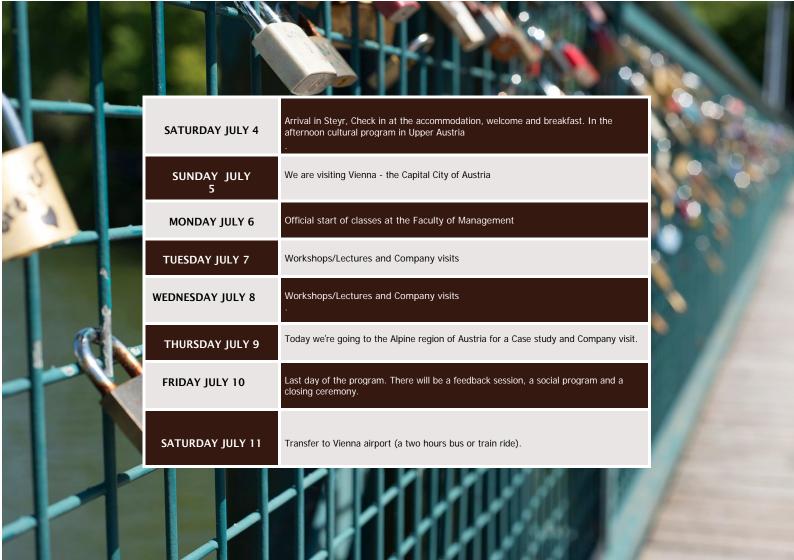

### **SECOND WEEK - PROGRAM** (STEYR)

The second week starts with a city trip to Vienna, continuing with a mixture of interesting lectures in Upper Austria University of Applied Sciences (Steyr) at the Faculty of Management.

Small and medium-sized Austrian companies, which have a truly global outreach will be focused on in the program. Not only will we show you which marketing strategies make them successful, we will also introduce you to innovative models of financing, make you familiar with specialities you need to know about European businesses. Additionally we will visit some successful companies.

A vivid mix of interactive lectures with experienced professors and top managers, company visits, case studies and challenging assignments will bring you days full of experience, entertainment and various fascinating impressions.

#### FOR WHOM?

Target Group of this Summer School are international, non- European students at the undergraduate level who would...

- like to learn and experience how the world of business looks like in Europe
- like to learn and experience how small and medium sized companies gain reputation and success
- like to find out which strategies European companies pursue and what their unique competitive approach is.
- appreciate a sound mix of classroom and company visit experiences to learn and feel how innovative worldwide successful businesses operate
- like to experience a multi-cultural environment and enjoy an attractive social and cultural program

Students whose first language is not English should have at least an intermediate or above level of English proficiency.
