

INTERNATIONAL BUSINESS

General data

Course code:	B19B03E
ECTS credits:	7
Type of the course:	core course
Semester:	Fall, Semester 5
Course restrictions:	-
Course leader (with availabilities):	Viktória Gerdesics Dr. gerdesicsv@tkk.pte.hu , +36 72 501-599/ 23343
Further lecturer(s) (with availabilities):	-

1. Description and aims

The module aims to introduce students to international business. The factors influencing the firm's decision as to the degree of internationalisation and the methods adopted are considered, as is the institutional framework within which international business must operate. External challenges to the international company are examined, such as those in the economic, political, cultural, ethical and legal fields or concerning ethics, responsible and sustainable business. Possible internal solutions to these challenges are considered, including strategic, human relations, marketing and logistical responses. The importance of multi-disciplinary perspective for purposes of analysis will be adopted throughout, as will the use of up-to-date case studies and applied materials, including the newest research results. Students should gain an appreciation for the complexity of the international environment facing businesses in the 21st century.

2. Intended Learning Outcomes (ILOs)

Upon the successful completion of this course, students should be able to:

1. Explain the key theoretical concepts in international business and, in particular, the distinctive characteristics of managerial processes within the international business environment (*PILO1, PILO2*);
2. Analyse how companies enter foreign markets and how they manage foreign operations in volatile environments (*PILO3*);
3. Assess issues in international trade, including the role of trading blocs such as the EU, and their effect on company strategy (*PILO1, PILO3*);
4. Assess the impact of cultural differences and cross-cultural communication on global marketing and research and identify appropriate opportunities in given situations (*PILO3, PILO4*).
5. Evaluate foreign investment decisions of international businesses in terms of aims, structure and options (*PILO3*);

6. Work in teams to apply theory to practical problems (*PILO5, PILO6, PILO7, PILO8*) and to possibly model an international company's business environment.

(The remarks in brackets express each CILO's connection to the Program Intended Learning Outcomes (PILOs).)

3. Content, schedule

1. Introduction – Globalisation
2. Cross-cultural business
3. Political economy and ethics
4. Economic development of nations
5. International strategy and organization
6. Analysing international opportunities
7. Selecting and managing entry modes
8. Developing and marketing products
9. International branding
10. Managing international operations, managing people
11. Ethics and social responsibility in sustainable international business
12. Global Ethics Project (GEP) presentations
13. Global Ethics Project (GEP) presentations

4. Learning and teaching strategy, methodology

Principal teaching methodologies: lecture and seminar, including continuous interactive discurs, in-class discussions, quick studies, example-searching and case-study-analysis, elaborated in teamwork

The course will be delivered through a continuous combination of lecture and seminar-type work (CILO1-5) in form of an interactive lecture and topic-specialised seminar both with continuous in-class discussion, quick studies, example-searching and case-study-analysis. The seminar-type work of the course provides the platform for the coursework, students working in groups, due to which they can model an international company's environment (CILO6) – thus this course uses the method of teamwork for special purposes. On the other hand, the emphasis will be on assisting students to 'make sense' of the world of international business. Thus extensive use will be made of contemporary examples in order to ground student learning through the identification of topical and recognisable cases from practice (CILO6) – necessarily using online sources for the work. Consultative sessions prior to and following delivery of the group assessment (appropriate and continuous feedback) will also feature the teaching programme. Additional international experience is gained by students through a joint teamwork with Ohio University's students, called Global Ethics Project (GEP). The GEP Project is an obligatory element of the course and gives 2 CIX (Compulsory International Experience) points.

5. Assessment

Formative assessment elements:

Continuous feedback on coursework (during the work and after assessment as well), supporting the student to understand the method of applying theory in practice, and getting to know the problematic areas of knowledge (also showing the lecturer the problematic areas). Interactive classes immediately

provide the opportunity to help understanding of the lecture but questions or need of clarifying some topics are free any time in the classroom or in the office hours of the lecturer.

Summative assessment elements:

Individual Assessment		60%	Group Assessment		40%	
Name of the element	Weight	Type	Details	Retake opportunity	Req.*	Related CIOs
Exam	60%	exam (individual, written)	Final exam will consist of shorter- and longer-type essay questions (40%), and true-false, multiple choice questions (20%) covering the learning materials. It can be resat during the exam period.	One retake opportunity.	yes	CILO1-5
Coursework	20%	coursework (teamwork, oral and/or written)	Each student should participate in continuous coursework. During the classes several tasks will be published by the lecturer connected to the given week's learning material and the students will be involved in group discussions, and/or asked to submit a written material as a result (presentation, essay or draft). The coursework aims to help the practical application of the theoretical knowledge, and to model the type of work in an international company.	In case the student misses the class, there is an opportunity to resit the given task by writing it individually and submitting it until the next week's class.	yes	CILO2-6
	20%	Global Ethics Project (GEP) with Ohio University	Students are continuously working with international students from Ohio University (online) on a global ethical problem. Instructions and documentation are provided in separate files.	This is a special type of teamwork. The work of the team is lead by a team leader, retake is also managed by him/her supported by the continuous consultation with the professor.		

* Req.: Completion of the element is required to pass the course, irrespective of the performance in other elements.
