

PÉCSI TUDOMÁNYEGYETEM  
UNIVERSITY OF PÉCS

### Climate protection campaign at University of Pécs!

The University of Pécs, together with its four foreign partner universities, is launching a video campaign within the V4 Green Universities project. Our aim is to enable university citizens to participate in the climate protection programs of universities with their own ideas.

As part of the **campaign, participants** are encouraged **to submit their self-made videos** showing what they would do differently on PTE in order to create a more **environmentally conscious, energy-efficient and healthier way of living**. The ideas may relate to the operation of our university, but they may also address any general topic related to climate protection.

Access to upload the videos will be provided between **1 March — 3 May**. The videos will be ranked by a jury of experts from the participating universities, and we will also organize an audience vote, for which the videos will be uploaded to [Instagram](#). The award ceremony will take place on 17 May.

The University of Pécs awards the best video with a **Mi Electric Scooter Essential**, besides we award 30 additional video creators **with 15 solar-powered outdoor power banks (Quazar Q-Solar cell, 10,000 mAh)** and **15 Mi Smart Band 5 activity trackers**.

Those who register to the video competition, will be awarded with free access to the interactive webinar of Mr Kovács Tamás photographer on the tricks of video shooting and digital photography

A detailed description of the competition can be found at [PTE Zöld Egyetem](#) website!

For motivation, you can watch the short film of the PTE Green University Program:  
[https://www.youtube.com/watch?v=W\\_prIP4FS1Q](https://www.youtube.com/watch?v=W_prIP4FS1Q).

Up for filming!
